

since biu can't pipe, so whether pipe true or false for lcbArbiter or buf dosen't matter, but pipe will add extra logic, so not pipe for lcbArbiter and buf are better choice.

```
splN = 2
outN = 1
pipe = true
flow = false
```

```
cmdDepth = 1
rspDepth = 0
cmdPipe = true
cmdFlow = false
rspPipe = false
rspFlow = false
```

```
splN = 5
outN = 1
pipe = false
flow = true
```
